Technology Empowered

As smart technology sweeps across every industry–embedding intelligence into our phones, home appliances, and even cars–the humble mirror, one of the most frequently used objects in daily life, has remained stuck in a centuries-old form.

Mirror is naturally a display surface, it has reflected our outfits and makeup for over a hundred years, yet its functionality has stayed stubbornly basic and unchanged.

Today, *VERCON* harnesses cutting-edge smart technology to reimagine the most traditional fixture in our homes: the mirror.

This isn't just a product upgrade–it's an industry revolution, delivering nothing less than a completely new way to experience everyday life.

Industry

Top

Step inside Vercon's manufacturing facility, and you'll immediately see it's unlike any traditional mirror factory–no dust, no clamor, just the quiet precision of a world-class electronics production line.

This is where the world's premier smart mirrors are born, backed by uncompromising quality standards.

Covering over 10,000 square meters, Vercon's dust-free production center is the largest smart mirror manufacturing facility on the planet. It delivers more than 60,000 units every month–all engineered to perfection.

With hundreds of expert engineers and highly skilled technicians overseeing every step, each smart mirror that rolls off the line meets top-tier quality benchmarks, without exception.

Glory Series

> *CABINET / MEDICINE CABINET*

01

Smart Light

- 6 PRESET MEMORY LIGHT
- MOTION SENSOR AUTO ON/OFF
- AI POWERED

02

Ai Defog

- INTEGRATED T&H SENSOR
- POWERED BY AI ALGORITHMS
- AUTO / SELF-ACTIVATING / OFF

03

Bluetooth Music

- BLUETOOTH CONNECTIVITY
- PREMIUM SPEAKERS

Base Models

Rectangle(W x H): 60*80 / 70*90 / 120*70 / 150*80cm

Round: Dia 60 / 70 /80cm

Ai Lighting

Experience the next generation of lighting: AI-driven and sensor-integrated, redefining traditional 3-color lighting.

- Features 6 programmable memory modes with single-tap controls, eliminating tedious long-pressing.
- Software-controlled lighting allows for precision adjustment of any color temperature and brightness, offering a fully personalized experience.
- Built-in motion sensor: Lights on when you arrive, lights off when you leave. Truly hands-free.
- AI-driven smart lighting: Automatically adjusts throughout the day. Bright, energizing light in the morning and a gentle night mode late at night—illuminating your path without disturbing your sleep.

Ai Defog

AI-powered proactive defogging: Integrated temperature and humidity sensors ensure a crystal-clear mirror at all times, freeing you from traditional controls.

- AI automatically activates defogging the moment steam appears. Never worry about forgetting to turn it on before your shower again.
- AI automatically powers off once defogging is complete, preventing the common mistake of leaving it on. Enjoy a truly worry-free bathroom experience.
- Smarter is safer. By automatically turning off the heater, eliminates the risk of overheating and electrical fires if the defogger is accidentally left on.
- Optimized Energy Saving: The AI defogger only runs when necessary—not for the entire shower. For a 15-minute bathroom session, AI can save up to 45% in energy consumption.

Who Says Bath Has To Be Quiet?

Multi-Medias

Vercon smart mirror features built-in high-fidelity speakers with seamless Bluetooth connectivity, turns your bath into a private concert.

- Bluetooth Connection Supported.
- Supports App Online Play (Grace / Crown Series)
- Mirror Casting Supported (Grace / Crown Series)

More Than a Mirror Reflecting Your Image

While traditional companies remain obsessed with physical reflections,
the smart revolution is already here.

AI-powered Evolution of Your Daily Ritual

We deliver more than hardware.
we deliver a revolutionary sensory experience and high-end emotional resonance.

The Bathroom Experience, Redefined Here!

From morning prep to wellness tracking and family care, our AI-powered magic mirror seamlessly integrates into your life. The bathroom experience, redefined.
